

# Particleboard Flooring Adhesive

**Trade Essentials Particleboard Flooring Adhesive is a solvent based mastic adhesive/sealant developed for use in the construction industry. It cures to form a tough flexible moisture resistant bond.**

## APPLICATION

Trade Essentials Particleboard Flooring Adhesive is recommended for bonding a wide variety of materials including timber, tileboard, hardboard, steel, aluminium and cement sheet etc. It is ideal for the installation of Trade Essentials Particleboard flooring and most other types of interior sub-flooring.

## TYPICAL PROPERTIES

Colour:	Buff paste
Solids:	76% approx.
Viscosity:	95,000 CPS approx.
Specific Gravity:	1.08kg/ltr
Coverage:	A 300ml cartridge will form 15 metres of a 5mm bead. An 850ml cartridge will form 40 metres of a 5mm bead.

## DIRECTIONS

Surfaces to be bonded must be clean and free from paint, oil, grease, dust etc. Ensure floor joists are flat and level. Apply adhesive in a 5-6mm bead over area to be covered by first sheet.

Position sheet and nail firmly to joists. Fix each subsequent sheet in the same manner but also run a 3mm bead of adhesive along top of tongue before placing into groove of previous sheet.

The joint will continue to gain strength for 2-3 days and maximum stress loading should not be applied until such time.

## CLEAN UP

Use Trade Essentials Adhesive Cleaner or Mineral Turpentine.
